**Subject:** RE: Pontoon removal

Here is the link for JARPA including instructions and Appendix E (application for use of State Owned Aquatic Land). [http://www.epermitting.wa.gov/site/alias\\_resourcecenter/jarpa\\_jarpa\\_form/9984/jarpa\\_form.aspx](http://www.epermitting.wa.gov/site/alias_resourcecenter/jarpa_jarpa_form/9984/jarpa_form.aspx)  
Consider that if this action is not required by EPA as part of the cleanup you will most likely need:

- 1) Shoreline Permit from City of Bremerton,
- 2) USACE Permit,
- 3) 401 Certification and Industrial Wastewater Permit from Ecology,
- 4) HPA from WDFW
- 5) As well as ROE from DNR.

These permit requirements are the reason we have not been able to have the pontoons successfully removed by contractors in the past. I will also note that Ecology is strongly opposed to having things scrapped in place. If Sesko is a PRP conducting cleanup actions required by EPA then, as I understand it, many of these permits including ROE from DNR may be waived as long as activity follows requirements that would otherwise be listed in the permit/agreement.

Please note that DNR will issue ROE after all other necessary permits are provided and will take at least a week to process. Lindie Schmidt will be the Land Manager that will process the Right-of-Entry application and her contact information is:

Lindie Schmidt  
Natural Resource Specialist II  
Shoreline District; Aquatics Program  
Washington State Department of Natural Resources (DNR)  
(206) 949-1740 (cell)  
Lindie.Schmidt@dnr.wa.gov

I hope meeting with Cascade is productive. I look forward to hearing how EPA chooses to proceed, Sesko's response, and timeline you are proposing for further action.

**Subject:** RE: Pontoon removal

It is possible we may need to make the removal of the pontoons part of the removal action. Thinking about the logistics of moving them or cutting them up, even if they cut them up on the beach it would be difficult to get the metal chunks off the beach since heavy equipment needs to stay off the beach. Perhaps if she gets it cut up on the beach, Cascade can hoist it off the beach and onto her property with the crane they need to use. I will talk to Cascade about that this afternoon.

I will send you the figures and write up on the proposed removal when I get them from the contractor. I should know after this afternoon when that will be.

Please tell me again what a JARPA is and send me a link to the website.

Thanks for voicemail. I checked with Division Manager and DNR will require a Right-of-Entry for removal of pontoons off beach. Let me know if Sesko or new owner will remove and timeline to anticipate receiving JARPA.

Access for interim actions (clay matt and partial removal) can be done under the existing Consent for Access (see above).

I look forward to receiving figures showing contaminant levels found. Also, when might I expect to see memo from consultants regarding proposed actions?

Thanks for keeping us informed. Look forward to hearing from you soon.
